“GENERIC” AT GLANCE.....

INTRODUCTION:-

Generic Engineering Construction and Projects Limited (“GENERIC”), a BSE and NSE listed Construction Company is engaged in the construction across commercial, residential, industrial, health and leisure and Institutional buildings with presence in states of Maharashtra, Karnataka, Gujarat, Goa and Himachal Pradesh.

The company has always focused on general contracting, Design-Build; Engineering, Procurement and Construction (EPC) work. The company has expertise in building data centers, hospitals, schools, all types of industrial and residential buildings. The company is a pioneer in building cold storages. The company’s forte lies in executing projects having a ticket size between ₹25 crore to ₹100 crore.

Generic is looking at large opportunities in the space of Engineering Procurement Construction (EPC) going ahead. This would require both capital investment and shoring up manpower—both skilled and semiskilled workforce. Likewise, the scale of operations would need more investment in monitoring, control, and compliance. With currently limited debt on books, bank funding and internal accruals can drive growth. In that context, there are funds currently dedicated to the construction, infrastructure and real estate segments and this company can be a good investment play.

30. The on remote e-voting period commences **Monday, September 26, 2022 at 09:00 AM** and ends on **Thursday, September 29, 2022 at 05:00 PM**. During this period members' of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date of **Friday, September 23, 2022** may cast their vote by remote e-voting. The remote E-voting module shall be disabled by CSDL for voting thereafter. Once the vote on a resolution is cast by the member, the member shall not be allowed to change it subsequently.

INSTRUCTION FOR REMOTE E-VOTING AND JOINING VIRTUAL MEETING ARE AS UNDER

A. The instructions of shareholders for remote e-voting are as under:

- (i) The voting period begins on **Monday, September 26, 2022 at 09:00 AM** and ends **Thursday, September 29, 2022 at 05:00 PM (IST)**. During this period shareholders of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date (record date) of **Friday, September 23, 2022** may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.

- (ii) Shareholders who have already voted prior to the meeting date would not be entitled to vote during the meeting.
- (iii) Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09.12.2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders'/retail shareholders is at a negligible level. Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

- (iv) In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. MANAGEMENT DISCUSSION AND ANALYSIS

Introduction

Generic Engineering Construction and Projects Limited (the Company) is engaged in the construction of residential, industrial, commercial and Institutional buildings with presence in Maharashtra, Karnataka, Gujarat, Himachal Pradesh and Goa. Generic offers general contracting, design-build; engineering, procurement and construction (EPC); and project management consultancy (PMC) services. The company's forte lies in executing projects having a ticket size between Rs. 25 crores to Rs. 100 crores. The company has expertise in building data centers, hospitals, schools, all types of industrial and residential buildings. The company is a pioneer in building cold storages. The company has the highest market share of contracting business in the fastest growing market of Navi Mumbai, where the company has delivered more than 300 industrial buildings. The company also provides designing and engineering services for architecture, structural, electrical, mechanical, HVAC, plumbing and sewerage, fire protection, building management, and infrastructure works.

Industry Structure and Development/ Economy/ Outlook

- (i) The global construction industry is expected to reach an estimated \$10.5 trillion by 2023, and it is forecast to grow at a CAGR of 4.2% from 2018 to 2023. The major drivers for the growth of this market are increasing housing starts and rising infrastructure due to the increasing urbanization and the growing population.

Emerging trends which have a direct impact on the dynamics of the construction industry include increasing demand for green construction to reduce carbon footprint, bridge lock-up device systems to enhance the life of structures, building information systems for efficient building management, and the use of fiber-reinforced polymer composites for the rehabilitation of aging structures.

- (ii) Construction Industry plays a major role in the economic growth of a nation and occupies a pivotal position in the nation's development plans.

India's construction industry employs a work force of nearly 32 million and its market size is worth about Rs. 2,48,000 crores. It is the second largest contributor to the GDP after the agricultural sector.

Construction sector is viewed as a service industry. It generates substantial employment and provides growth impetus to other manufacturing sectors like cement, bitumen, iron and steel, chemicals, bricks, paints, tiles etc. whose combined value is Rs.1, 92,000 crores annually. The construction equipment market is valued at Rs.1,05,000 crores.

- (iii) The 2020 recession was among the shortest ever, but its impact continues to be observed across both the larger US economy and the engineering and construction (E&C) industry. In our 2021 outlook, we stated that the E&C industry's strong order books and better control over its leverage and credit could lead to a quicker recovery. Indeed, the industry reached and surpassed pre-pandemic gross domestic product (GDP) levels by Q3 2020 and since then has been adding more than \$20 billion to the economy every quarter. Total construction spending continues to remain strong, reaching record-high levels in July 2021. While the industry recovered close to 0.9 million of the 1.1 million jobs lost to the pandemic and maintained a strong order book, six in 10 firms surveyed are experiencing project delays due to workforce shortages. 2021 revenue growth for the industry is projected to be around 6.9% and will likely accelerate further in 2022. Despite a positive outlook, the industry faces considerable hurdles, some new, but many familiar. Among the major ones is the growing disconnect between the growth of the residential and nonresidential market segments. While the former showed a significant uptick, with building permits and housing starts at record-high levels, the nonresidential construction segment struggled for much of 2021, with spending levels significantly below 2019. The rising cost of materials and equipment and supply chain disruptions are other factors that continue to impair the industry's margins, while pervasive talent shortages are among those topics quickly rising on the boardroom agenda. Outside these, absorbing next-generation digital technologies, integrating data and analytics into workstreams, and implementing end-to-end connected construction capabilities are top of mind for executives.

In 2022, as we move into the second year of recovery, the industry has a big role in supporting the nation's growth plan. The Infrastructure Investment and Jobs Act (IIJA), with investments across health care, public safety, and other public infrastructure, is expected to bode well for the E&C firms and is likely to accelerate recovery across the nonresidential segment. The residential segment is expected to stay strong and exhibit similar activity as it did in 2021. The industry has increased its investments in digital, including through mergers and acquisitions (M&A), as it prepares to shift toward connected construction capabilities. These technologies can help E&C firms support initiatives such as smart cities, urban air mobility, and climate change programs and help enhance internal operational efficiencies, reduce costs, and improve margins. 2022 is likely to be an exciting year for the industry.

Opportunities

As a veteran in the industry, Generic is having potential in getting more projects in the industrial and IT sector.

Further, having wide range of working experience in Hospital Industry, we have already completed or nearly completion of Hospital projects, which will help our Company to bagged more such projects.

Demand for world class infrastructure in India

- **“Make in India”** initiative would demand good infrastructure specifically roads, railways, etc thus **offering opportunities for construction companies.**
- Government’s **“100 smart cities”** initiative
- **Higher budgetary allocation** for infrastructure sector
- **Pro- industry policies and initiatives** such as lowering of corporate tax, setting up of REITs and Infrastructure Investment Trusts would drive investment in Infrastructure sector, etc.

Strengths

We have the highest market share of contracting business in the fastest growing market of Navi Mumbai. In the ticket size that the company operates, there are very few organized players. We also have higher pricing power and enjoy healthy margins. Your company is a preferred choice for EPC, General Contracting and Design & Build. The company is known for timely execution of projects. Till date, no penalty has been levied on the company for execution delays and the company has history of zero accidents.

We have dedicated to achieving cost & time optimization. The company has close association with leading architects and consultants. Most of the clients approach the company again, for undertaking any expansion work. The company has not faced litigations from any client since last 50 years nor faced any arbitration with any client.

We are a pioneer in building cold storages. We have expertise to build cold storages up to the range of -40° C. Till date, the company has built more than 80 cold storages, including the biggest one in Mumbai. The company has invented deep blasting freezer for cold storages. Reliance Foundation plans to build more than 40 hospitals at different locations in India, out of which the company has already bagged orders for building 5 hospitals.

The company’s strength lies in effective man-power sourcing. The company’s financial position is robust. The management believes in most efficient utilization of funds.

Threats/ Risk and Concerns

Our Company remains exposed to risks which could impact our operating and financial performance. These risks could be macro, geopolitical, environmental, health related and sector specific in nature. We continue to remain vigilant and have mitigation strategies in place to minimise the impact from such risks.

- **Geopolitical tensions leading to supply chain disruptions**

Risk: Given the escalating geopolitical tensions in Europe, there may be significant disruption to various supply chains and the resultant price volatility. In case of prolonged conflict, this may have an impact on the economy in general including real estate sector.

Mitigation: While it is pretty evident that any such disruption impacts global economy instantly, impact of the same on longer time horizon in case such conflicts lasts longer, is hard to predict. Most of our inputs are domestic in nature and thus face muted global disruption risks. As a company, we are committed to keep our sourcing for inputs from diversified sources which lowers such risks.

- **Performance of construction industry**

Risk: A slowing economy and changes in the regulatory environment might harm the construction sector affecting the Company’s operations.

Mitigation: The Company is in a good position to take advantage of expanding market prospects. Every quarter, the Company examines its policy with a focus on accomplishing its major business objectives within the policy framework, which includes growth, profitability, and risk mitigation measures. The Company is expanding numerous categories and geographies as part of its effort to ensure long-term growth.

- **Availability and Price of Raw Materials**

Risk: The enforcement Steel, ready-mix concrete, steel, pipe and pipe fittings, and cement are only a few of the basic resources that the Company needs. Due to a supply and demand mismatch, severe competition, and fluctuations in production levels, its price and availability may be affected. Price changes and failure to purchase items on schedule may influence the Company's brand value and profitability

Mitigation: The Company has maintained positive, mutually beneficial relationships with its suppliers, ensuring a steady supply of high-quality raw materials. It also engages in contracts where the conditions include a general escalation clause based on the wholesale price index of materials, which transfers the risk of fluctuating input prices to the client. Seasonal changes in raw material costs, however, are unavoidable and are accounted for in the cost calculations.

- **Changes in the Competitive Landscape**

Risk: The construction business is vulnerable to both new and established competitors. The intense rivalry may result in pricing pressure, affecting the Company's profitability and growth.

Mitigation: The Company is devoted to boosting efficiency, decreasing wastage, and cost optimisation, among other things, to remain competitive and secure projects without sacrificing profitability. Furthermore, the Company is dedicated to a strong customer relationship management strategy, with an emphasis on repeat purchases from the private sector and expansion into new public-sector business fields.

- **Business Disruption and Uncertainty**

Risk: The operations were hit by a second wave as a result of the current Coronavirus epidemic, which caused substantial supply chain risk and poor client demand. It might result in a drop in growth and profitability.

Mitigation: For such an unusual event, contingency plans were devised and reassessed as circumstances changed. Senior management and operational teams continued to keep an eye on the situation in order to provide timely education and assistance.

- **Project delay risk**

Risk: If projects are not finished on time, then the company is susceptible to increased cost and loss of reputation which can hurt the order book.

Mitigation: The Company has processes, systems and strong human capital which continuously improves the project management capabilities of the organisation and engages in careful bid preparation to avoid any over utilisation of resources.

- **Safety concerns**

Risk: Onsite accidents can lead to serious or fatal injuries which is against the company's policies and ethos. Moreover, there is risk from pecuniary and nonpecuniary losses to the company.

Mitigation: The company considers the safety of all its personnel's including off payroll workers in the construction site, as the highest priority. Therefore, the company deploys safety measures such as safety gear for workers, equipment's integrated with warning systems and safety attachments, standard operating procedure (SOP) manual.

Internal Control

The Company has an adequate internal financial control system commensurate with the size, scale and complexity of its operations. It has put in place adequate controls, procedures and policies for ensuring orderly and efficient conduct of its business including adherence to polices, safeguarding its assets, prevention and detection of frauds and errors, accuracy and completeness of accounting records. Appropriate frameworks have been designed to have internal controls over financial reporting, which ensures the integrity of financial statements of the Company and reduces possibility of malpractice. Design of key processes and various policies are reviewed periodically, from the point of view of adequacy of controls.

The Board of Directors and management at all levels of the Company demonstrate through their directives, actions and behaviours the importance of integrity and ethical values to support the functioning of the system of internal control. The 'Code of Conduct' and the 'Whistle-blower/ Vigil Mechanism' policies form an integral component of the internal control system. The Code of Conduct compliance is mandatory for employees and the Whistle-blower / Vigil Mechanism policies enables employees and vendors to raise genuine concerns about any actual or suspected ethical / legal violations or misconduct or fraud, with adequate safeguards against victimisation, fear of punishment or unfair treatment.

The internal financial controls operate at the entity and process levels, and are aligned with the requirements of the Companies Act, 2013. The Audit Committee of the Board reviews the internal audit covering core business operations, corporate departments as well as support functions.

The Company also has an institutionalised mechanism of dealing with complaints of sexual harassment and have Policy on the 'Protection of Women's Rights at Workplace' under relevant statutory guidelines. This policy has been widely disseminated across the Company and all complaints are addressed in a time-bound manner.

FORM NO. MR.3
SECRETARIAL AUDIT REPORT

For the Financial Year Ended 31st March, 2022

*[Pursuant to section 204(1) of the Companies Act, 2013 and rule 9 of the Companies
(Appointment and Remuneration of Managerial Personnel) Rules, 2014]*

To,
The Members,
Generic Engineering Construction and Projects Limited
201 & 202, Fitwell House, 2nd Floor,
Opp. Home Town L B S Road, Vikhroli (West),
Mumbai – 400083

We have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **M/s. Generic Engineering Construction and Projects Limited** (hereinafter called the “**Company**”). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing our opinion thereon.

Based on our verification of the Company’s books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, we hereby report that in our opinion, the Company has, during the audit period covering the financial year ended on March 31, 2022 (“**Audit Period**”) complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter.

We have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the financial year ended on March 31, 2022 according to the provisions of:

- (i) The Companies Act, 2013 (“**the Act**”) and the rules made thereunder;
- (ii) The Securities Contracts (Regulation) Act, 1956 (“**SCRA**”) and the rules made thereunder;
- (iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;
- (iv) Foreign Exchange Management Act, 1999 and the rules and regulations made there under to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings. (**Not applicable to the Company during the audit period**)
- (v) The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 (“**SEBI Act**”):-
 - (a) The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011;
 - (b) The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015;
 - (c) Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018;
 - (d) The Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2014 and Securities and Exchange Board of India (Share Based Employee Benefits and Sweat Equity) Regulations, 2021 (**Not applicable to the Company during the audit period**);
 - (e) The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008/The Securities and Exchange Board of India (Issue and Listing of Non-Convertible Securities) Regulations, 2021 (**Not applicable to the Company during the audit period**);
 - (f) The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 regarding the Companies Act and dealing with client;
 - (g) The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2009/The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2021; (**Not applicable to the Company during the audit period**) and

(h) The Securities and Exchange Board of India (Buyback of Securities) Regulations, 2018; **(Not applicable to the Company during the audit period)**

(vi) We further report that, as Identified and Confirmed by the Company, No law is specifically applicable to it during the audit period. We have also examined compliance with the applicable clauses of the following:

- (i) Secretarial Standards issued by the Institute of Company Secretaries of India.
- (ii) The SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

During the period under review, the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above except for the followings:

1. *The Company was not in compliance with the requirements of the minimum number of Independent Directors on the Board under Regulation 17(1) of SEBI (LODR) Regulations, 2015 for some days during the audit period. However, the Company was in compliance with the said regulation as on March 31, 2022;*
2. *Special Resolution passed by the shareholders for the re-appointment of Mrs. Sheetal Nagda as an Independent Director of the Company for her second term in the AGM held on September 29, 2021 which was not in accordance with the requirement of section 149(10) of the Companies Act, 2013; and*
3. *The Board Report of the company for the year ended March 31, 2021 has been signed by two executive directors instead of two directors including the managing director as required under section 134(6) of the Companies Act, 2013.*

We further report that:

The Board of Directors of the Company is duly constituted with proper balance of Executive Directors, Non-Executive Directors and Independent Directors except mentioned above. The changes in the composition of the Board of Directors that took place during the period under review were carried out in compliance with the provisions of the Act.

Adequate notice is given to all directors to schedule the Board Meetings and agenda items were sent at least seven days in advance and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.

All decisions at Board Meetings and Committee Meetings are carried out either unanimously or majority as recorded in the minutes of the meetings of the Board of Directors or Committee of the Board, as the case may be.

We further report that there are adequate systems and processes in the company commensurate with the size and operations of the company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines. Further, the structured digital database as required under regulation 3(5) of SEBI (PIT), Regulations, 2015 was not fully operational as on March 31, 2022.

We further report that during the audit period:

- a) The Company has taken approval for shareholders in 27th AGM held on September 29, 2021 for approving limits for the Loans, Guarantee/Security and Investment made by the Company in terms of the provisions Section 186 of the Companies Act, 2013 for an amount not exceeding of Rs. 200 Crores by Special Resolution;
- b) The Company has taken approval for shareholders in 27th AGM held on September 29, 2021 for waiver of recovery of excess remuneration for the financial year ended March 31, 2021 for Mr. Manish Patel, Mr. Tarak Gor and Mr. Jayesh Rawal, Directors of the Company by Special Resolutions.

Information other than the financial statements and auditors' report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the Financial Statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibilities for the financial statements

The accompanying financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The board of directors are also responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

1. The Company has provided (and)/paid managerial remuneration which is in accordance with the requisite approval mandated by the provisions of Section 197 of the Act read with Schedule V to the Act.

Annexure - B to the Auditors' Report

Independent Auditor's Report on the internal financial controls with reference to the financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

We have audited the internal financial controls over financial reporting of Generic Engineering Construction and Projects Ltd ("the Company") as of 31st March, 2022 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and those receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS**1. SIGNIFICANT ACCOUNTING POLICIES:****(A) CORPORATE INFORMATION**

Generic Engineering Construction and Projects Limited is Listed Public Limited Company incorporated under the Provisions of Companies Act, 1956, having registered office at 201 & 202, 2nd Floor, Fitwell House, Opp. Home Town, LBS Road, Vikhroli (West), Mumbai – 400083 and engaged in the construction of residential, industrial, commercial and Institutional buildings.

(B) BASIS OF PREPARATION

The company's financial statements have been prepared in accordance with accounting principles generally accepted in India including the Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2016 notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act.

The financial statements have been prepared on a historical cost convention except for the certain financial assets & liabilities measured at fair value (refer accounting policy regarding financial instruments)

The financial statements are presented in Indian Rupees (Rs.) and all values are recorded to the nearest lakhs, except where otherwise indicated.

Accounting policies followed in the preparation of these financial statements are consistent with the previous year.

(C) Significant accounting judgments, estimates and assumptions

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make judgments, estimates and assumptions that affect the reported amount of assets and liabilities as of the balance sheet date, reported amounts of revenues and expenses for the period ended and disclosure of contingent liabilities as of the balance sheet date along with their disclosures. The estimates and assumptions used in these financial statements are based upon management's evaluation of the relevant facts and circumstances as on the date of the financial statements. Existing circumstances and assumptions about future developments, however may change due to market changes or circumstances arising that are beyond the control of the Company. Actual results may differ from those estimates. Any revision to accounting estimates is recognized prospectively. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Revenue Recognition

The Company account for revenue in accordance with Ind AS 115 (Revenues from Contracts with Customers). The unit of account in Ind AS 115 is a performance obligation. A contract's transaction price is allocated to each distinct performance obligation and recognised as revenue when, or as, the performance obligation is satisfied. The Company's performance obligations are satisfied over time as work progresses. Stage of completion is determined with reference to the certificates authorized and approved by clients/consultants appointed by client as well as on the billing schedule agreed for value of work done during the year.

Due to the nature of the work required to be performed on the performance obligations, the estimation of total revenue and cost at completion is complex, subject to many variables, and requires significant judgment.

Costs associated with specific risks are estimated by assessing the probability that conditions arising from these specific risks will affect the Company's total cost to complete the project. After work on a project begins, assumptions that form the basis for the Company's calculation of total project cost are examined on a regular basis and the Company's estimates are updated to reflect the most current information and management's best judgment. The nature of accounting for long-term contracts is such that refinements of the estimating process for changing conditions and new developments are continuous and characteristic of the process. There are many factors, including, but not limited to, the ability to properly execute the engineering and design phases consistent with customers' expectations, the availability and costs of labour and material resources, productivity, and weather, all of which can affect the accuracy of the Company's cost estimates, and ultimately, its future profitability.

Taxes

Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Employee benefit plans

The cost of defined benefit gratuity plan and other post-employment benefits are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The mortality rate is based on publicly available mortality tables for India. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates.

Estimation of provisions and contingencies

Provision for expected credit losses of trade receivables and contract assets

Impairment of financial assets

The impairment provision for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Estimated impairment allowance on trade receivables is based on the aging of the receivable balances and historical experiences. Individual trade receivables are written off when management deems them not to be collectible.

(D) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Current versus non-current classification

The Company presents assets and liabilities in the standalone balance sheet based on current/ noncurrent classification.

An asset is treated as current when it is:

- i) Expected to be realised or intended to be sold or consumed in normal operating cycle,
- ii) Held primarily for the purpose of trading,
- iii) Expected to be realised within twelve months after the reporting period, or
- iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- i) It is expected to be settled in normal operating cycle,
- ii) It is held primarily for the purpose of trading,
- iii) It is due to be settled within twelve months after the reporting period, or

- iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

Operating cycle for current and non-current classification

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

2. Fair value measurement of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i) In the principal market for the asset or liability, or
- ii) In the absence of a principal market, in the most advantageous market for the asset or liability

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value includes discounted cash flow analysis, available quoted market prices and dealer quotes. All methods of assessing fair value result from general approximation of value and the same may differ from the actual realised value.

3. REVENUE RECOGNITION

Revenue from contracts with customers is recognised when control of the goods and services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

Revenue is measured based on the consideration specified in the contract with customers. The Company recognizes revenue when or as it transfers control over a good or service to a customer.

Allocation of transaction price to performance obligations - A contract's transaction price is allocated to each distinct performance obligation and recognised as revenue, when, or as, the performance obligation is satisfied. To determine the proper revenue recognition method, the Company evaluate whether two or more contracts should be

combined and accounted for as one single contract and whether the combined or single contract should be accounted for as more than one performance obligation. This evaluation requires significant judgment; mostly the Company's contracts have a single performance obligation as the promise to transfer the individual services is not separately identifiable from other promises in the contracts and, therefore, not distinct.

Variable consideration is included in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when that uncertainty associated with the variable consideration is subsequently resolved.

Progress billings are generally issued upon completion of certain phases of the work as stipulated in the contract. Payment terms may either be fixed, lump-sum or driven by time and materials. Typically, the customer retains a small portion of the contract price until completion of the contract.

Revenue recognised over time - The Company's performance obligations are satisfied over time as work progresses when performance obligations are fulfilled and control transfers to the customer. Revenue from services transferred to customers is recognised over time. Stage of completion is determined with reference to the certificates given by the Clients / Consultants appointed by Clients as well as on the billing schedule agreed with them for the value of work done during the year.

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.

4. PROPERTY PLANT & EQUIPMENT (PPE)

Tangible Assets:

Property Plant & Equipment are stated at cost of acquisition less accumulated depreciation and impairment loss, if any. The cost of acquisition includes direct cost attributable to bringing the assets to their present location and working condition for their intended use. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date and excludes any tax for which input credit is taken.

Subsequent expenditure is capitalised only when it increases the future economic benefits for its intended from the existing assets beyond its previously assessed standard of performance. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives and capitalises cost of replacing such parts if capitalisation criteria are met. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Gains or losses arising from derecognition of property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

Assets individually costing Rs. 5000 or less are expensed out in the year of acquisition.

Intangible Assets:

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly.

5. DEPRECIATION

Depreciation on Tangible assets:

Depreciation is provided on the written down value method over the useful life of the assets as specified in Schedule II of the Companies Act, 2013. Depreciation is charged on a pro-rata basis from/ up to the date of acquisition /sale or disposal.

The Company has used the following useful lives as prescribed in Schedule II of the Companies Act, 2013

Name of the Asset	Estimated Useful Life (Years)
Air Conditioner	10
Computer	3
Motor Car	8
Motor Bike	10
Office Equipment	5
Office Premises	60
Building Container	12
Machinery	15
MS Centering	12
Winget Bar Cutting Machine	12
Furniture & Fixtures	10
Software	3
Printer	3

6. IMPAIRMENT OF ASSETS

As at the end of each accounting year, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the said assets are tested for impairment so as to determine the impairment loss, if any. The intangible assets with indefinite life are tested for impairment each year.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is determined:

- i) In the case of an individual asset, at the higher of the net selling price and the value in use; and
- ii) In the case of a cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of the cash generating unit's net selling price and the value in use.

The amount of value in use is determined as the present value of estimated future cash flows from the continuing use of an asset and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the Company suitably adjusted for risks specified to the estimated cash flows of the asset).

For this purpose, a cash generating unit is ascertained as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss is recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

7. FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent measurement of financial assets:

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification financial assets.

Following are the categories of financial instrument:

- a) Financial assets at amortised cost
 - b) Financial assets at fair value through other comprehensive income (FVTOCI)
 - c) Financial assets at fair value through profit or loss (FVTPL)
- a) **Financial assets at amortised cost** Financial assets are subsequently measured at amortised cost using the effective interest rate method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in the statement of profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables, loans and other financial assets.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

Debt financial assets measured at FVOCI: Debt instruments are subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI financial assets is reported as interest income using the EIR method.

c) Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading. Other financial assets such as unquoted Mutual funds are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- a) the rights to receive cash flows from the asset have expired, or
- b) the Company has transferred its rights to receive cash flows from the asset, and
 - i) the Company has transferred substantially all the risks and rewards of the asset, or
 - ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

On derecognition of a financial asset in its entirety, the differences between the carrying amounts measured at the date of derecognition and the consideration received is recognised in the Statement of Profit and Loss.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss ('ECL') model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, deposits, trade receivables and bank balance
- b) Financial assets that are debt instruments and are measured at FVTOCI.
- c) Financial guarantee contracts which are not measured as at FVTPL.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk.

Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

1. All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
2. Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss. In the balance sheet, ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, loans and borrowings.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss. Gains or losses on liabilities held for trading are recognised in the profit or loss Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Group may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss.

Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings.

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior

management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

8. INVENTORIES

The Inventories have been valued at cost or net realizable value whichever is lower. The Inventory is physically verified by the management at regular intervals. Cost of Inventory comprises of Cost of Purchase, Cost of Conversion and other Costs incurred to bring them to their respective present location and condition.

Cost of Centering Material, Construction Materials are Valued at cost or net realizable value whichever is lower, Work-in-progress consist of Work done but not certified and the incomplete work as on balance sheet date and same is valued at cost or net realizable value whichever is lower.

9. EMPLOYEE BENEFIT EXPENSES

Short term employee benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages and short term compensated absences, etc. and the expected cost of ex-gratia are recognised in the period in which the employee renders the related service.

Defined Benefit Plan

Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on Projected Unit Credit Method made at the end of the financial year. Actuarial gains and losses for both defined benefit plans are recognized in full in the period in which they occur in the statement of OCI.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the standalone balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense

10. TAXATION

Current Tax:

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. Current income tax relating to items recognised outside profit or loss are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax:

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit and loss (either in other comprehensive income or in equity).

11. Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds including interest expense calculated using the effective interest method.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset until such time as the assets are substantially ready for the intended use or sale. All other borrowing costs are expensed in the period in which they occur.

12. PROVISIONS, CONTINGENT LIABILITIES & CONTINGENT ASSETS

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain.

The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

Contingent liability is disclosed in the case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- a present obligation arising from past events, when no reliable estimate is possible;
- a possible obligation arising from past events, unless the probability of outflow of resources is remote.

A contingent asset is disclosed where an inflow of economic benefits is probable.

Provisions, contingent liability & contingent asset are reviewed at each balance sheet.

13. EARNING PER SHARE

Basic earning per share is calculated by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year. Diluted earning per share adjusts the figures used in determination of basic earnings per share to take into account the conversion of all dilutive potential equity shares.

14. LEASES**Where the Company is lessee**

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets

The right-of-use assets are also subject to impairment.

Lease Liabilities

At the commencement date of the lease, the company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Fair value hierarchy

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable
The following table provides the fair value measurement hierarchy of Company's financial assets and financial liabilities

- During the periods mentioned above, there have been no transfers amongst the levels of hierarchy.
- The carrying amounts of Security deposits, trade receivables, other financial assets, cash and cash equivalents, fixed deposits with banks, current borrowings, trade payables and other current financial liabilities are considered to be approximately equal to their fair value, since those are current in nature.
- The fair values computed above for assets measured at amortised cost are based on discounted cash flows using a current borrowing rate. They are classified as level 3 fair values in the fair value hierarchy due to the use of indirectly observable inputs.

Valuation process

The Company evaluates the fair value of financial assets and financial liabilities on periodic basis using the best and most relevant data available.

NOTE : 34 : Risk Management :-

Financial risk management objectives and policies

The Company's principal financial liabilities, other than derivatives, comprise borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, and cash and cash equivalents that derive directly from its operations. The Company is exposed to market risk, credit risk and liquidity risk. Company's senior management oversees the management of these risks. It is Company's policy that no trading in derivatives for speculative purposes may be undertaken. The Board of Directors review and agree policies for managing each of these risks, which are summarised below.

a) Market risk

Market risk is the risk of any loss in future earnings, in realisable fair value or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of change in the interest rates, foreign currency exchange rates, liquidity and other market changes. Future specific market movements cannot be normally predicted with reasonable accuracy.

I. Interest rate sensitivity Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Company have exposure to the risk of changes in market interest rates as Company's long-term debt obligations is at floating interest rates. Interest Rate Sensitivity on Interest Amounts is as follows

Particulars	Interest Amount for the F.Y. 2021-22	Change in Floating Rates	Changes in Interest amount due to change in Interest rates
Interest Amount	473.81	1%	478.55
	473.81	2%	473.81
	473.81	3%	488.03
	473.81	4%	492.76

a) Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. For the Company, liquidity risk arises from obligations on account of financial liabilities – borrowings, trade payables and other financial liabilities.

Liquidity risk management

Company's treasury department is responsible for liquidity and funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through forecasts on the basis of expected cash flows.

The table below summarises the maturity profile of Company's financial liabilities based on contractual undiscounted payments.

Other financial liabilities	-	-	-	420.28	-	420.28
Trade payables	-	3,096.48	-	-	-	3,096.48

b) Credit risk

Credit risk arises from cash and bank balances, current and non-current financial assets, trade receivables and other financial assets carried at amortised cost.

Credit risk management

To manage credit risk, the Company periodically assesses the financial reliability of customers and other counterparties, taking into account the financial condition, current economic trends, analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly. The Company uses a provision margin to compute the expected credit loss allowance for trade receivable. Also, trade receivables are monitored on periodic basis for any non-recoverability of the dues.

Particulars	2021-22	2020-21
Opening balance of allowance for doubtful accounts	297.41	-
Additions during the year	251.82	297.41
Closing balance of allowance for doubtful accounts	549.23	297.41

Company's credit period generally ranges from 15 to 60 days

The gross carrying amount of a financial asset is written off (either partially or in full) when there is no realistic prospect of recovery.

Percentage of revenue from top 5 customers for F.Y 2021-22 is 63.75%, revenue from operations (it's 65.06% for 2020-21)

B) Capital management

1. Risk management

The Company's objectives when managing capital are to

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, Company may adjust the amount of dividends paid to shareholders.

Note No. 35 Disclosure under Ind AS 19 “Employee Benefits”

Gratuity

Benefit Scheme:

Gratuity is payable to all the eligible employees at the rate of **15 days salary (Basic + D. A.)** for each completed year of service, subject to a **payment ceiling of INR 2,000,000**, in line with Payment of Gratuity Act, 1972.

The formula to calculate daily salary is $1/26 * \text{monthly salary}$ and vesting period is **5 years**.

In line with Gratuity Act, service more than 6 months is considered as 1 year, so past service is calculated as rounded years of service.

Gratuity shall be payable to an employee on termination of employment due to superannuation, retirement or resignation after successful completion of the vesting period. The completion of vesting period is not applicable in the case where termination of employment is due to death, disability. To provide for the aforementioned eventualities and to arrive at the present value of the defined benefit obligation, we have incorporated the underlying assumptions for this actuarial valuation –

Valuation Assumptions:

Following assumptions are used in preparation of this actuarial valuation as required under **Indian Accounting Standard 19 (Ind AS 19)**:

Discount Rate:

The rate used to discount employee benefit obligations reflects the estimated term of the benefit obligation and shall be consistent with the currency and term of the government bonds. We have used the Discount Rate as **6.41% p.a.** which relates to the rate available on Government Securities (G. Sec.) for the tenure of **5 years** i.e. the average expected future working life of employees (estimated term of obligation). The rate is taken as per the deal rate as on 31-03-2022.

Salary Escalation Rate:

Estimates of future salary increase are based on inflation, seniority, promotion and other relevant factors such as demand and supply in the employment market. This assumption has been determined in consultation with the entity. Salary Escalation rate is considered as 5.00% p.a. for all future years.

Attrition Rate:

As discussed with entity, Attrition rate is considered as **15.00% p.a.** for all future years.

Mortality Rate:

Since no separate analysis of the mortality rate for the entity was undertaken, we have considered the latest unisex mortality table available. We have used **Indian Assured Lives Mortality (2012-14) Ultimate** - Urban table for death rate and to provide for liability on account of death while in service.

The rates are assumed to include permanent disablement.

Retirement Age:

We have considered the retirement age for all employees as **58 years**, as provided by the entity.

Summary of Valuation Assumptions

Date of Valuation	31/03/2022	31/03/2021
Discount Rate	6.41% p.a.	6.06% p.a.
Salary Escalation Rate	5.00% p.a.	10.00% p.a.
Attrition Rate	15.00% p.a.	15.00% p.a.
Retirement Age	58 Years	58 Years
Mortality Rate	Indian Assured Lives Mortality (2012-14) Ultimate	Indian Assured Lives Mortality (2012-14) Ultimate

Recognition of Actuarial Gains and Losses:

As required under Indian Accounting Standard 19 (Ind AS 19), Actuarial Gains and Losses should be recognised immediately in the Statement of Other Comprehensive Income.

Materiality:

Information is material if its omission or misstatement could influence the economic decisions of users taken on the basis of the financial statements.

The result of the valuation was shared with the entity. The determination and interpretation of the assumptions was discussed with the client and was thereby found suitable.

Reasonableness of Assumptions:

The assumptions with regards to salary escalation and attrition rates are the expectations of the entity based on the salary increment that the entity will provide in future and the expected turnover in the future.

As per Accounting Standard assumptions are management's best estimate assumptions and thereby the assumptions given by entity are accepted. We have checked for reasonableness of assumptions and discussed impact of assumptions on provision to ensure entity's accounts give true and fair view.

The results are particularly sensitive to some assumptions, such as the discount rate, level of salary inflation, level of employee turnover and mortality. For example, a decrease in the assumed discount rate or an increase in salary inflation will lead to an increase in reported liability.

Method of Valuation:

To calculate the Defined Benefit Obligation, we have used the Projected Unit Credit Method (PUCM) which is suggested under Indian Accounting Standard 19 (Ind AS 19) as notified under The Companies (Indian Accounting Standards) Rules, 2015.

Valuation Result:

Accrued liability (discontinuance liability) as on 31-03-2022 after considering all employees (vested and non-vested employees) works out as INR 5,346,665. This is for representation purpose only and not to be accounted in balance sheet.

The result of this actuarial valuation report is dependent on the actuarial assumptions used. The Defined Benefit Obligation towards Gratuity along with the Current and Non-current liability in accordance with Schedule III of The Companies Act of India, 2013 is tabulated below:

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same method as applied in calculating the defined benefit obligation as recognised in the balance sheet.

There is no change in the methods and assumptions used in preparing the sensitivity analysis from previous year.

Gratuity Plan - Unfunded

The entity has a defined benefit gratuity plan in India (unfunded). The entity's defined benefit gratuity plan is a final salary plan for employees. Gratuity is paid from entity as and when it becomes due and is paid as per entity scheme for Gratuity

Risk Exposure

Salary Risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

Interest rate risk: A fall in the discount rate which is linked to the G.Sec. Rate will increase the present value of the liability requiring higher provision.

Asset Liability Matching Risk: The plan faces the ALM risk as to the matching cash flow. Entity has to manage pay-out based on pay as you go basis from own funds.

Mortality risk: Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.
